

ALTEN UK receives 2023 Supplier Excellence Award from Jaguar Land Rover in the Impact category

Press release
[06/30/2023]

For the seventh year, Jaguar Land Rover (JLR) has celebrated the outstanding achievements of its global supply chain at the Supplier Excellence Awards. Among the 2023 winners, ALTEN UK has won the award in the Impact category, celebrating the Group's innovation. This prestigious recognition highlights ALTEN UK's outstanding performance in delivering significant cost savings for JLR through the IGNITE 24 initiative.

The Impact category

The Impact category of the JLR's Supplier Excellence Awards recognizes change-makers. This award recognizes the key role of ALTEN in the development of new, more sustainable technologies, across all energy storage devices. Drawing on its long experience in HV Batteries and 5 years of project management within the EP5 department, ALTEN has deployed a highly qualified team of 3 engineers. Taking full ownership of the GEARS process, the team managed it from start to finish, from idea generation to implementation. The ALTEN UK teams have made a significant contribution, which will have a great impact on future JLR vehicles. Through initiatives such as these, the Group reinforces its commitment to excellence.

Denis Federico, ALTEN UK Managing Director “*This recognition is a testament to our unwavering commitment to support the builders of tomorrow – providing them with the skills and capacity for innovation they need to make a difference. Congratulations to every member of our team who contributed to this remarkable achievement! I look forward to seeing what the future holds as we continue to innovate and collaborate with JLR, shaping the automotive industry together!*”

Innovation: a key pillar of the ALTEN Group

JLR's award speaks to the Group's commitment to supporting its customers' development strategies in the fields of innovation, R&D and technological information systems. ALTEN is constantly reinforcing its eco-responsibility in the face of the climate and societal challenges facing global society: every year, over 25% of our innovation activities address an ecological or sustainable environmental issue.
