

# A<sup>3</sup> - AI AT ALTEN

We support you in taking advantage of AI in Engineering and IT Services.

With AI experts and a global community of AI-augmented engineers, **ALTEN helps clients adopt AI responsibly and efficiently**, combining innovation, sustainability and operational excellence. Our approach ensures optimized performance, seamless integration and secure deployment, delivering high-impact, AI-driven solutions tailored to engineering and IT challenges.

## ALTEN's assets

**5,000+**  
Data & AI Experts

Experts mastering AI technologies and their impacts on business.

**15,000+**  
AI-infused engineers

AI Awareness Program & Prompt Engineering Academy for all Engineers in the Group.

**17AI**  
Competence Centers

Supporting AI deployment over the world.

**60+**  
AI Accelerators

Pre-configured solutions designed to expedite the deployment and roll-out of AI.

**300+** AI infused projects in run mode

Roll-out across all industries.

## Tailored solutions to deliver AI enhanced services

### AI FOR ENGINEERING & IT SERVICES

#### AI FOR PROJECT PERFORMANCE

How ALTEN improves the performance of our projects delivered to customers by infusing AI

- AI for software development
- AI for test & QA
- AI for knowledge & document management
- AI for project management
- AI for customer support
- AI for process automation

#### AI FOR CUSTOMER BUSINESS

How ALTEN helps customers to improve their processes by means of AI

- AI use case – discovery
- AI use case – development
- AI use case – deployment

#### AI-ENABLEMENT CONSULTING

How ALTEN guides customers to implement AI

- AI strategy
- AI readiness assessment
- AI technology advisory
- AI platform & security
- AI training
- AI governance – TRISM

AI Data Preparation

AI Competences

AI Accelerators

# Wide spectrum of AI benefits

ALTEN has achieved measurable gains in AI projects, with results depending on AI readiness, data and infrastructure maturity.

## Boost your project performance with AI

- +25%** in software development
- +37%** in test generation
- +35%** in customer support
- +32%** in knowledge and document management
- +23%** in project management

Beyond productivity, AI enhances project lead-time, product quality, risk and knowledge management, as well as employee and customer satisfaction.

# ALTEN AI accelerators

Our accelerators are pre-configured solutions designed to expedite the deployment and roll-out of AI across various industries. Here are 2 examples out of our catalogue of 60+ accelerators:

## ARIA - TEST GENERATION ASSISTANT

### What it does

A pre-trained AI assistant that provides 360° guidance in test design and documentation.

### How it works

From an input file, the AI generates a test book with all test cases, ensuring high-quality testing with ISTQB® methodologies.

### Why it matters

- Reduces manual effort, improving productivity and test coverage.
- Measured KPI in first adoption projects:
  - Test Coverage: +15%
  - Accuracy: +15%
  - Productivity: +37%
  - Satisfaction: +75%

## PRISM - PERSONALIZED RESEARCH AND INFORMATION SYNTHESIS ON MULTIMODAL DATA

### What it does

PRISM uses multimodal AI and semantic search to deliver smart, real-time answers from structured and unstructured data.

### How it works

PRISM uses multimodal AI for precise queries, integrates with any database, and supports on-premise deployment for security.

### Why it matters

- Enhances search by combining generative AI with semantic search, surpassing keyword-based methods.
- Delivers a user-friendly chat interface, making information retrieval seamless and intuitive.

# Our integrated AI technology ecosystem

End-to-end solutions for high-performance and responsible enterprise AI adoption, combining innovation, sustainability, and operational efficiency.

<b>Development &amp; deployment</b>		<b>Low-code/No-code &amp; Automation</b>	
<b>MLOps &amp; Governance</b>			
<b>Foundation Models &amp; LLMs</b>			
<b>Vector Databases</b>			
<b>Data Management Platforms</b>			
<b>Cloud Infrastructure</b>			

## Enterprise systems integration

- CRM
- ERP
- ATS
- HR IS
- LMS
- ...

## Clients benefits

- Up to 60% faster deployment
- An average of 40% cost reduction
- Scalable solutions
- Built-in compliance
- Enterprise-grade security
- Seamless integration
